STATE HOUSE, BOSTON

# MORTALITY OF MASSACHUSETTS

For the Week ending January 1, 1887.

## Deaths reported to the State Board of Health in 20 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

## Population by State Census of 1885.

1887

## REPORTED DEATHS FROM PREVALENT DISEASES IN THE 20 CITIES AND GREATER TOWNS OF MASSACHUSETTS:

Thirty-two deaths were reported from the principal infectious diseases: diphtheria and croup, 9; measles, 7; diarrhœal diseases, 6; typhoid fever, 5; scarlet fever, 2; cerebro-spinal meningitis, 2; puerperal fever, 1.

No deaths were reported from small-pox and malarial fevers.

There were 88 deaths from acute lung diseases; consumption, 53; and still-births, 28.

From typhoid fever: Cambridge, 2; Boston, Worcester and Fitchburg, 1 each. From scarlet fever: Boston and Gloucester, 1 each. From cerebro-spinal meningitis: Fall River, 2. From puerperal fever: Cambridge, 1.

Deaths from the principal infectious diseases numbered 32 against 45 for the preceding week.

Deaths under five years of age numbered 138 against 118 for the preceding week.

Cases reported in Boston: diphtheria, 28; scarlet fever, 26; measles, 16; and typhoid fever, 14.

There is a slight increase in the mortality from measles and acute lung diseases, and a decrease in the deaths from diphtheria and croup. No noteworthy changes in the other diseases.

Death-rates for the week were: Boston, 26.77; Worcester, 19.76; Lowell, 32.66; Cambridge, 21.36; Fall River, 15.54; Lynn, 16.95; Lawrence, 17.42; Springfield, 9.66; New Bedford, 21.84; Somerville, ——; Salem, 24.05; Holyoke, ——; Chelsea, 30.30; Taunton, 11.41; Haverhill, ——; Gloucester, 11.95; Brockton, ——; Newton, ——; Malden, ——; Fitchburg, 20.28; Waltham, 7.12; Newburyport, 3.80; Northampton, ——.

The total death-rate for the week was 21.77 against 20.50 and 21.05 for the previous two weeks.

# WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Jan. 22, 1887

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
JAN 1887

# MORTALITY OF MASSACHUSETTS

For the Week ending January 22, 1887.

## Deaths reported to the State Board of Health in 19 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Feb. 12, 1887

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE BOARD OF HEALTH MASSACHUSETTS,
STATE HOUSE, BOSTON.
FEB 10 1887

# MORTALITY OF MASSACHUSETTS

For the Week ending February 12, 1887.

## Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Feb. 26, 1887.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
MAY 27 1919
MAY 3 1937

# MORTALITY OF MASSACHUSETTS

For the Week ending February 26, 1887.

## Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

## Population by State Census of 1885.

| CITIES AND TOWNS. | POPULATION. | Reported Deaths in Each. | Deaths under 5 years. | DEATHS FROM | | | | |

STATE LIBRARY OF MASSACHUSETTS
MAY 27 1919
CAMBRIDGE

# MORTALITY OF MASSACHUSETTS

For the Week ending March 12, 1887.

## Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10.000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# WEEKLY RETURN OF MORTALITY

—OF—

MASSACHUSETTS.

Oct. 2, 1857.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

MAY 27 1919

# MORTALITY OF MASSACHUSETTS

For the Week ending April 2d, 1887.

## Deaths reported to the State Board of Health in 23 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# WEEKLY RETURN OF MORTALITY

—OF—

MASSACHUSETTS.

April 6, 1867.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
APR 5 1867

# MORTALITY OF MASSACHUSETTS

For the Week ending April 16th, 1887.

## Deaths reported to the State Board of Health in 19 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
OCT 16 1937

# MORTALITY OF MASSACHUSETTS

FOR THE WEEK ENDING MAY 7, 1887.

## Deaths reported to the State Board of Health in 17 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# Weekly Return of Mortality

—OF—

## MASSACHUSETTS.

Week ending May 28, 1887.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE BOARD OF HEALTH OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
JUN 11 1887
MAY 27 1919

# MORTALITY OF MASSACHUSETTS

FOR THE WEEK ENDING MAY 28, 1887.

## Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# Weekly Return of Mortality

—OF—

# MASSACHUSETTS.

June 12, 1887.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
MAY 27 1937

# MORTALITY OF MASSACHUSETTS

FOR THE WEEK ENDING JUNE 11, 1887.

## Deaths reported to the State Board of Health in 24 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week; but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# MORTALITY OF MASSACHUSETTS

FOR THE WEEK ENDING JULY 2, 1887.

## Deaths reported to the State Board of Health in 17 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# MORTALITY OF MASSACHUSETTS

FOR THE WEEK ENDING JULY 16, 1887.

## Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# Weekly Return of Mortality

—OF—

# MASSACHUSETTS.

Aug. 23, 18[illegible]

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE BOSTON
AUG 30 1887

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING AUGUST 20, 1887.

### Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Sept. 24. 1887.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
OCT 1887

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING SEPT. 24, 1887.

### Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

| CITIES AND TOWNS. | Estimated Population. | Reported Deaths in Each. | Deaths under 5 years. | Deaths From | | | | |
|---|---|---|---|---|---|---|---|---|

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING OCT. 8, 1887.

### Deaths reported to the State Board of Health in 23 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING OCT. 29, 1887.

### Deaths reported to the State Board of Health in 18 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING NOV. 12, 1887.

### Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

## RECAPITULATION.

| | Population. | Deaths. | Deaths under five. | Infectious Diseases. | Consumption. | Diarrhœal Diseases. | Diphtheria and Croup. | Scarlet Fever. |
|---|---|---|---|---|---|---|---|---|
| Total of reporting towns, | 1,004,630 | 403 | 136 | 78 | 59 | 12 | 34 | 18 |

## REPORTED DEATHS FROM PREVALENT DISEASES IN THE 21 CITIES AND GREATER TOWNS OF MASSACHUSETTS.

Seventy-eight deaths were reported from the principal infectious diseases: diphtheria and croup, 34; scarlet fever, 18; diarrhœal diseases, 12; typhoid fever, 9; cerebro-spinal meningitis, 4; erysipelas, 1.

No deaths were reported from small-pox, malarial fevers and measles.

There were 59 deaths from consumption; acute lung diseases, 55; still-births, 20.

From typhoid fever: Boston, 4; Lowell, 2; Cambridge, Fall River and New Bedford, 1 each. From cerebro-spinal meningitis: Worcester, Fall River, Haverhill and Newburyport, 1 each. From erysipelas: Somerville, 1.

Deaths from the principal infectious diseases numbered 78 against 71 for the preceding week.

Deaths under five years of age numbered 136 against 120 for the preceding week.

Cases reported in Boston: scarlet fever, 73; diphtheria, 25; typhoid fever, 22; and measles, 6.

The death rates for the week were: Boston, 25.47; Worcester, 13.87; Lowell, 25.28; Cambridge, 17.00; Fall River, 16.93; Lynn, 11.99; Lawrence, ——; Springfield, ——; New Bedford, 15.10; Somerville, 26.72: Salem, 18.40; Holyoke, ——; Chelsea, ——; Taunton, 15.12; Haverhill, 15.89; Gloucester, 11.65; Brockton, 15.96: Newton, 20.56; Malden, 15.05; Fitchburg, 23.03; Waltham, 13.60; Newburyport, 30.24; Northampton, ——.

The total death rate for the week was 20.85 against 20.42 and 19.82 for the previous two weeks.

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING NOV. 19, 1887.

### Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING DEC. 3, 1887.

### Deaths reported to the State Board of Health in 20 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

# Weekly Return of Mortality

—OF—

# MASSACHUSETTS.

Dec. 24, 1887.

PUBLISHED BY ORDER OF THE

## STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
JAN 5 E 1888

# MORTALITY OF MASSACHUSETTS

## FOR THE WEEK ENDING DEC. 24, 1887.

### Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

| CITIES AND TOWNS. | Estimated Population. | Reported Deaths in Each. | Deaths under 5 years. | Deaths From | | | | |
